Calculate Area and Perimeter

Write an Algorithm and draw a Flowchart to Calculate the area and perimeter of a square.

Algorithm:

Step 1 : Start

Step 2 : Read the value of a

Step 3 : $A = a * a$

Step 4 : Print A as the area of the square.

Step 5 : $P = 4 * a$

Step 6 : Print P as the perimeter of square.

Step 7 : Stop

Flowchart:

Ex. No.: 2

Date: 18/10/24

Days to Year Conversion

Write an Algorithm and draw a Flowchart to convert the given days into years & months.

Algorithm:

Step 1: Start

Step 2: Get input from number of days 'n'.

Step 3: $\text{year} = n/365$
 $\text{Month} = (n \% 365) / 30$

Step 4: Print year, month

Step 5: Stop

Flowchart:

Ex. No.: 3

Date: 18/10/24

Prime Number

Write an Algorithm and draw a Flowchart to check whether the given number is Prime or not.

Algorithm:

- Step 1: Input an Integer x .
- Step 2: Initialize i with value 0.
- Step 3: Increment the value x if it is divisible by 2.
- Step 4: If divisible by 2 print "Not a prime number."
- Step 5: If not divisible by 2 print "It is a prime number"

Flowchart:

Ex. No.: 4

Date: 18/10/24

Leap Year

Write an Algorithm and draw a Flowchart to check whether the given year is Leap year or not.

Algorithm: Start

Step 1: Input integer variable year

Step 2: If year is divisible by 4 but not 100 print "leap year".

Step 3: If year is divisible by 400 Print "leap year".

Step 4: else print "not leap year".

Stop

Flowchart:

Ex. No.: 5

Date: 18/10/24

Palindrome Number

Write an Algorithm and draw a Flowchart to check whether the given number is palindrome number or not.

Algorithm: Start

Step 1: Input a number

Step 2: Initialize the number in a temporary variable temp.

Step 3: Reverse the number

Step 4: compare the temporary number with reversed number.

Step 5: If both number are same, print "palindrome number".

Step 6: Else print "not palindrome number".
Stop

Flowchart:

Ex. No.: 6

Date: 18/10/24

Sum of Digits

Write an Algorithm and draw a Flowchart to calculate the sum of digits in the given number.

Algorithm: Step 1 : Start

Step 2 : Input a number

Step 3 : Get the remainder of the number

Step 4 : Divide the number 10

Step 5 : Repeat the step 2 while number is greater than 0.

Step 6 : stop

Flowchart:
